

# 0.95 quantiles for $F$ distributions ( $f_{0.05,d_1,d_2}$ values)

This table gives  $f_{0.05,d_1,d_2}$  values for different  $(d_1,d_2)$ 's, where  $f_{a,d_1,d_2}$  is defined such that  $P(F(d_1,d_2) > f_{a,d_1,d_2}) = a$  and  $F(d_1,d_2)$  is the  $F$  distribution with  $(d_1,d_2)$  degrees of freedom.
